

Note for WPVI-TV Public Inspection File

The contract(s) in this folder set forth the ordered days and dayparts by advertiser. Actual dates and times that announcements were broadcast are shown on invoices, which are generated monthly or at the end of a schedule. Individuals interested in the actual time an announcement ran before an invoice is generated may contact the station for assistance: Dirk Ohley, 215.581.4582.

6abc Rate Class Addendum for Candidates

WPVI's standard classes of time, for both commercial and candidate advertisers, are as follows:

- Generally Non-Preemptible
- Pre-emptible with notice
- Pre-emptible without notice

To better monitor whether candidates may qualify for rebates based on changing rates charged to commercial advertisers for the same class of time, WPVI assigns different codes to commercial and political advertisements within the same class. The numerical coding used by the station is as follows:

<u>Description</u>	<u>Commercial Rate Class Designation</u>	<u>Candidate Rate Class Designation</u>
Generally Non-Preemptible	1	7
Preemptible with Notice	2	8
Preemptible without Notice	3	9
